

The Perfect C

Results for Young Women Ages 18 to 23

Considered to be the most sensitive group; this group is the most receptive and has shown extremely favourable results. In just three short months significant improvement in breast tissue mass can be expected.

Within the first month you will notice an increase in fullness and firmness (this is a very good sign, this shows your body is reacting very positively to Perfect C. Throughout the second and third month your bust line will continue to increase in size and fullness.

The results are permanent, but it is recommended that you continue to take a reduced dosage (2 capsules, 3 times a week) for one to two months after achieving your desired size.

Girls of this age are more sensitive to the active ingredients, therefore when they go for breast enlargement they should be very careful not to exceed the recommended dosage.

Results for Women Ages 23 to 35

The survey results were best for this group. Within the first 60 days of usage women experienced the greatest improvement overall in increasing size and fullness. Throughout the second and third month you can expect your bust line will continue to increase in both size and fullness.

Fuller lips and unusually fast hair and nail growth was one positive side effect reported by this group.

The desired results are permanent, but it is recommended that you continue to take a reduced dosage (2 capsules. 3 times a week) for one to two months.

Results for Adult Women Ages 36 to 55

There was a slow progress for women in the first few weeks in terms of tissue mass or uplifting. However, during three to six months dramatic results were reported by nearly all. These results included tightening of the skin in the breast area: that flattened the stretch marks and made them unnoticeable. It also smoothed wrinkled areas. Increased sex drive and fuller lips were also reported.

In addition to its effect on the bust, women also report extraordinary benefits from Perfect C in relieving irregular or painful menstrual periods, cramping, bloating, mood swings, and menopausal symptoms.

Perfect C Enhancer Capsules are specially formulated to enhance the size and shape of your breasts safely and quickly; without the pain and health risks of surgical implants. With no negative side effects, it's a practical, low cost and it's completely NATURAL solution!

in little to no time at all. While gaining up to one, two even three full cup sizes within a few short months.

The Way Perfect C Enhancer Works...

A woman's breasts contain estrogen receptors sites which stimulate the development of the mammary gland. Perfect C combines an exotic mix of rare botanicals that naturally contain estrogenic properties. When these 13 key ingredients are consumed the estrogen receptor sites are stimulated which then promote the growth of healthy new breast tissue in women.

Ultra Perfect C Capsules do not themselves contain estrogens or hormones but promote the natural activity of hormonal production. Because they replace excess estrogen in the system they also calm hormonal swings and dramatically reduce monthly pre-menstrual discomfort. Many women also report accelerated hair and nail growth as well as increased sexual desire.

Health, Safety, & The Right Decision...

There have been no adverse side effects with Perfect C enhancer. Ultra Breast enhancer is different, unlike other brands which only contain five to eight of the thirteen necessary ingredients; each Perfect C enhancer capsule is certified to contain all thirteen breast enhancing botanicals.

Perfect C enhancer is a time-proven solution, when you're ready we're here to help make a difference everyone will notice....

Perfect C Enhancer Capsules do not themselves contain estrogens or hormones but promote the natural activity of hormonal production. This safely stimulates the development of new breast tissue.

Women report favourable corrections in hormonal imbalance resulting in dramatic reductions of monthly pre-menstrual discomfort and mood swings. Many women also report an increase in sexual desire.

There have been no adverse side effects reported to date. As associated with similar products in the market, reports of acne outbreaks or weight gain have never been reported.

The Perfect C

Ingredients

Each Perfect C Enhancer capsule contains all thirteen of nature's most effective breast tissue growth-promoting botanicals. Perfect C Enhancer unique formula was developed by chemists with over 50 years experience in the dietary supplement field. The ingredients used in Ultra Breast Enhancer are:

Fenugreek Extract (trigonella foenumgraecum):

Fenugreek is a unique herb indigenous to countries on the eastern shores of the Mediterranean. Rich in phyto-estrogens, fenugreek aids in hormonal production, and facilitates the development of the mammary glands which 'feed' on estrogens.

Saw Palmetto (serenoa repens):

Saw Palmetto is a small palm tree with large leaves and large deep red-blackberries found on the North American Atlantic Coast. Saw Palmetto berries contain an oil with a variety of phyosterols. Studies have shown Saw Palmetto may successfully reverse atrophy of the mammary gland.

Fennel Seed (foeniculum vulgare):

Found in the coastal and sub-mountainous regions of southern Italy, Fennel has long been praised for its abundance of flavonoids. These compounds exert mild estrogenic effects and is used to stimulate and repair the growth of new breast tissue.

L-Tyrosine (amino acid):

A naturally occurring amino acid, Tyrosine plays an important role in the functioning of the adrenal, pituitary, and thyroid glands, which control hormone production. Some studies suggest that Tyrosine may also stimulate the production of growth hormone which helps build muscle and reduce body fat. Mexican

Wild Yam (dioscorea villosa):

Commonly used as a treatment for Osteoporosis, Mexican Wild Yam is an excellent source of Beta-Carotene, and diosgenin which are powerful phytochemicals aiding in optimal breast development.

Kelp (fucus vesiculosus):

Kelp is an excellent source of minerals from the sea, including iodine which is very important for the thyroid to function properly.

Damiana (tuma aphrodisiaca):

Damiana is a small shrub found in the West Indies. It is high in phytochemicals such as alpha-pinene, beta-carotene, beta-pinene and beta-sitosterol. Damiana is primarily used for treating female hormone imbalances.

Dong Quai (angelica sinensis):

For centuries this Asian root has been used to treat menopausal symptoms such as hot flashes and cramps. It has been shown that Dong Quai may assist the body in efficiently using hormones.

Mother's Wort (leonurus cardiaca):

Mother's Wort is native to many parts of Europe on banks and under hedges. Mother's Wort contains Leonurine which is a uterine stimulant.

Black Cohosh Extract (cimicifuga racemosa):

Native to the Eastern Woodlands of North America, numerous studies have been conducted to show the medical benefits of Black Cohosh. Studies suggest that Black Cohosh may have similar effects as the drugs used in hormone replacement therapy.

Avena Saliva (oat straw):

Avena Saliva is rich in saponins, flavonoids, minerals, and alkaloids necessary for a healthy hormonal system.

Blessed Thistle (carduus benedictus):

Native to South America and Western Asia, Blessed Thistle has long been used around the world as a hormonal balancing agent in women.

Humulus Lupulus:

Humulus Lupulus is a Eurasian shrub which is rich in flavonoids whose action in regulating the hormonal production facilitates development of the mammary glands.
